Average Wholesale Prices – Petroleum Activity Tax (PAT) Calculated Gross Receipts

Publication Date: June 6, 2023

Period: 07/01/2023 – 09/30/2023

Pursuant to section 5736.02(C) of the Ohio Revised Code, the Tax Commissioner shall determine and publish online the statewide average wholesale prices of a gallon of unleaded regular gasoline, of a gallon of propane, and of a gallon of diesel fuel for each calendar quarter.

The averages below are to be used to determine the calculated gross receipts of a supplier subject to the PAT for the period **July 1, 2023 – September 30, 2023**. These averages should not be used to determine the calculated gross receipts for any other period.

Shown as Dollars per Gallon, Excluding Taxes

Fuel Type	Average*
Unleaded Regular Gasoline	\$2.339
Diesel Fuel**	\$3.056
Propane***	\$0.788

* Rounded up to the nearest one-tenth of one cent, as required by state law. Data extracted from [U.S. Energy Information Administration \(EIA\)](https://www.eia.gov) website.

**At the national level, wholesale prices for No. 2 Distillate are separated between No. 2 Diesel Fuel and No. 2 Fuel Oil, but at the state level for Ohio, it is reported as a combined average. At the national level, wholesale prices for No. 2 Distillate and diesel fuel are nearly identical for most years.

*** Shows nationwide refiner average monthly wholesale price of propane. State-level propane prices are published by EIA only for the months of high demand for heating oil (October through March); U.S. average prices published by EIA are the best proxy to Ohio prices.
